VALUEWORKS LONG-BIASED COMPOSITE

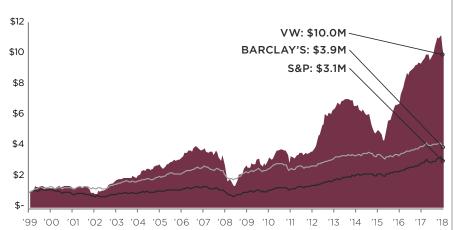

NOVEMBER 2018

STRATEGY SUMMARY

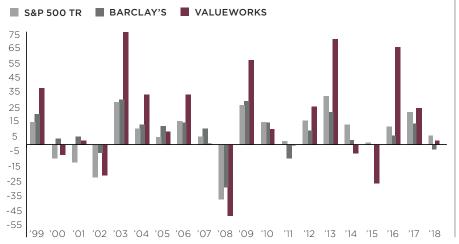

ValueWorks' long-biased composite accounts are managed with a bottomup, research-driven, value discipline. We seek investments in publicly traded entities where a disparity exists between the value of a company's underlying assets and the price at which they can be controlled through a specific security; securities across the capital structure are evaluated for the best risk return profiles. The objective for these portfolios is to generate superior capital appreciation with average market volatility. We target 100% net-long exposure within a range of 75% - 125%, comprised of 80-150% gross-long exposure and 0-35% gross-short exposure. Our hedge fund, VWLP, is part of this group*.
