ValueWorks Capital Appreciation Composite

Q1 2014

VALUEWORKS' CAPITAL APPRECIATION COMPOSITE:

Capital Appreciation accounts offer diversified core equity exposure for long-term investors seeking disciplined value management. Portfolios contain primarily large capitalization U.S. equities, but may also include securities senior in the capital structure and/or smaller capitalization and foreign domiciled equities, to enhance return opportunities and mitigate risk. Typical portfolios have 25-35 individual investments allowing for indepth knowledge of and high conviction in each holding, while avoiding over diversification that may limit performance. We manage risk by limiting individual security and sector exposure.

PHILOSOPHY:

At ValueWorks we define value investing as buying the bestquality assets at the best possible **prices**. We like to think of ourselves as bargain hunters: it is our goal to pay only \$0.50 to \$0.75 for \$1.00 worth of assets. We evaluate the component parts of a company, assigning each of its assets a dollar value that, when added together, comprises the underlying value of the company; if this is higher than the company's stock price, we consider it an investment opportunity.

PORTFOLIO MANAGER:

Charles Lemonides CFA has 20 plus

years of investment experience. Before founding ValueWorks 2001 in Mr. Lemonides managed the portfolios for 5 years and worked for nearly 10 years as a securities analyst at

Gruntal & Co. In his coverage of distressed debt, arbitrage opportunities and takeover stocks, Mr. Lemonides honed skills in financial markets, statement analysis and in valuing a diverse range of businesses and assets that continue to inform his investment decisions and philosophy today. He is a frequent quest in the financial media: CNBC, Bloomberg and in the Wall St Journal.

PROCESS:

- **1. Identification** We monitor the financial markets to identify securities that match our investment criteria—focusing on opportunities that appear misunderstood by the general market.
- **2. Appraisal** First we identify the assets; then we appraise them. This allows us to determine the company's *underlying value*. We then decide whether the assets are of high quality and therefore likely to appreciate over time.
- **3. Assessment** Here we assess any claims against a company's assets; we then compare the market price of the claims to the company's *underlying value*.
- If a particular security trades at a discount, we identify factors that could eliminate the valuation gap and increase its price. We then make a decision on the purchase of the security.
- **4. Re-Evaluation** We continuously monitor our positions to determine if our original investment thesis still applies, taking necessary action to optimize our portfolio.
- **5. Exit** We exit a position when a security either reaches full valuation or changes in its outlook invalidate part of our original thesis.

DISCLOSURES

Past performance is not indicative of future results.

<u>Capital Appreciation Composite</u> contains all accounts with a Capital Appreciation mandate. For comparison purposes the composite is measured against the S&P 500 Index.

ValueWorks has prepared and presented this report in compliance with the Global Investment Performance Standards (GIPS®).

ValueWorks is a separate registered investment adviser. Prior to September 30th, 2001, ValueWorks was a subdivision of M&R Capital. The firm maintains a complete list and description of composites, which is available upon request.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results.

The U.S. Dollar is the currency used to express performance. Gross returns are shown as supplemental information and are stated gross of all fees and transaction costs; net returns are reduced by all fees and transaction costs incurred. Wrap accounts pay a fee based on a percentage of assets under management. Other than brokerage commissions this fee includes investment management, portfolio monitoring, consulting services, and in some cases, custodial services. Wrap accounts make up 100% of the composite for all periods shown. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the respective wrap sponsor. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year beginning December 31, 2001. From January 1, 1996 to December 31, 2001 dispersion reflected an equal weighted dispersion. Additional information regarding the policies for calculating and reporting returns is available upon request.

The management fee schedule is as follows: Low and high rate for wrap sponsors: 1.25% and 2.75%, respectively. Fee schedules from individual wrap sponsors are available upon request. Actual investment advisory fees incurred by clients may vary.

The Capital Appreciation Composite was created December 31, 1995. Performance presented prior to October 1, 2001 occurred while the Portfolio Manager was affiliated with two prior firms and he was the only individual responsible for selecting the securities to buy and sell. ValueWorks' is in compliance with the GIPS standards for the period October 1, 2001 through December 31, 2007. In addition, a performance examination was conducted on the Capital Appreciation Composite beginning October 1, 2001.
